

One Day Cross-Learning National Workshop on Climate Resilient Urban Water Infrastructure

The workshop focuses on sharing best practices, field experiences, governance strategies, assessment frameworks, and technological interventions from different cities to enhance adaptive capacity, strengthen risk assessment, and promote robust and sustainable urban water management systems in the context of climate change.

This cross-learning workshop brings together professionals from ULBs, state departments, researchers and academicians to deliberate on practical challenges and scalable solutions, while also serving as the dissemination platform for the research on Climate-Resilient Urban Water Infrastructure undertaken for Tier II cities - Ujjain, Sagar and Narmadapuram.
